LOOBRITE TOILET CLEANER

-  Sweet / Fresh Fragrance
-  Cleans & Maintains
-  Powerful Formula

Description:

ProJanta Loobrite Toilet Cleaner and Descaler is a thick, concentrated cleaner developed for toilets, urinals and other sanitary ware where effective cleaning and descaling are essential. It is formulated to kill germs while removing limescale and organic deposits, helping leave washroom fixtures clean, fresh and well maintained. In addition to toilet and urinal cleaning, it is also effective at rapidly removing grease, body fats and soap scum from baths, sinks and showers, making it a versatile choice for washroom hygiene. Supplied as a blue, sweet-smelling liquid, it combines strong descaling performance with a fresh fragrance after use. With a concentrate pH of 2, it is available in both 1-litre and 5-litre pack sizes. Always wear gloves and eye protection during use.

Directions:

Loobrite Toilet Cleaner and Descaler should be used according to the level of soiling and the type of surface being treated. For heavy toilet bowl cleaning, first remove the water from the bowl by forcing it over the trap with a mop applicator, then pour the product neat into the bowl and spread it evenly around the surface. After treatment, flush with clean water and scrub any remaining solution into the water. For regular toilet cleaning, apply the product evenly above the water line, leave for 10-15 minutes, then flush with clean water. For urinals, apply the product to the top of the urinal, scrub the affected areas with a brush or applicator, and then flush thoroughly with clean water. For hard surfaces such as baths, sinks and showers, dilute at 1:40 with warm water and wash the affected surface using a suitable applicator.

When handling and using the product, suitable protective gloves and eye protection should be worn, and the product should be stored in a cool, well-ventilated place after use.
