DRAINFLOW LIQUID DRAIN MAINTAINER

-  Solvent Free
-  Odourless Fragrance
-  Powerful Formula

Description:

ProJanta Drainflow is an odourless, solvent-free drain cleaner gel formulated to help maintain free-flowing, cleaner drains. It works by penetrating and softening hardened fats, grease, food deposits and paper blockages, making it suitable for routine drain care in a wide range of environments. Regular use can also help keep drains smelling neutral while reducing the gradual build-up of grease and fat over time. Supplied as an off-white liquid with a barely perceptible odour, it is designed for preventative maintenance as well as general drain cleaning. A typical maintenance dose is 50-100ml per application, making it easy to use as part of a regular care programme. Always handle with appropriate PPE, including gloves and eye protection, and keep securely stored out of reach of children.

Directions:

Drainflow should be used as part of a regular drain maintenance programme to help keep drains smelling neutral and reduce the build-up of fats, grease, food deposits and paper residues over time. Before handling the product, wear suitable protective gloves, eye protection and protective clothing. Pour 50-100ml directly down the drain per application, repeating on a bi-weekly or monthly basis depending on usage levels and maintenance requirements.

The gel is designed to penetrate and soften blockages and deposits within the drain system as part of ongoing preventative care. After use, wash hands thoroughly. Keep the container tightly closed when not in use and store out of reach of children.
