SAFE HANDS SANITISING HAND SOAP

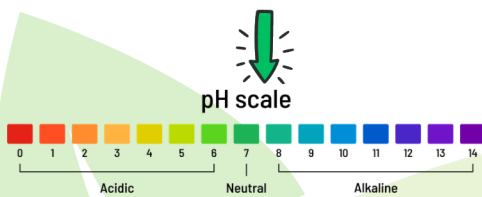

-  Taint free
-  Anti-Bacterial
-  Odourless Formula

Description:

ProJanta Safe Hands Sanitiser Hand Soap is a water-based, bactericidal anti-bacterial hand soap developed for regular hygiene use throughout the day. Designed for frequent handwashing, it provides effective cleansing while being suitable for environments where odour and taint transfer must be avoided. Its odourless, non-tainting formula makes it especially practical for workplaces and hygiene-sensitive settings where clean hands are essential without leaving residual fragrance. Suitable for use with wall-mounted dispensers or pump dispensers fitted to free-standing bottles, it offers flexible application across a variety of washroom and workplace environments. Supplied as a yellow, water-soluble liquid, it is intended for thorough hand washes.

Available in both 1-litre and 5-litre pack sizes.

Directions:

Safe Hands Sanitiser Hand Soap should be used as part of a regular hand hygiene routine throughout the day. Wet hands thoroughly at the sink, then apply 2 pumps of soap from the wall-mounted or pump dispenser. Lather well for at least 30 seconds, ensuring full coverage of the hands and wrists and paying particular attention to the fingernails. Where required, use a nail brush to clean underneath the nails before rinsing thoroughly with clean water.

Suitable for frequent use in environments where an odourless, non-tainting antibacterial hand soap is required. After use, keep the container tightly closed and store in a cool, well-ventilated area.

Useful Information:

Product Code:	1419
Product Colour:	Yellow
Product Fragrance:	Almost Odourless
pH Level:	7 - 8
Also available in:	1L, 5L
