SPOT FREE DISHWASHER RINSE AID

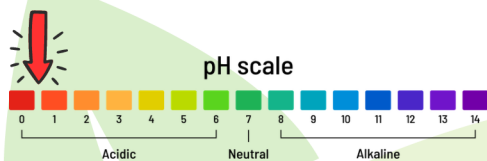

-  Streak Free
-  Water-Soluble
-  Acidic Formula

Description:

ProJanta Spot Free Rinse Aid is an acidic rinse additive developed for use in automatic dishwashers and glasswashers to help deliver a clean, sparkling finish. It works by neutralising detergent deposits that can cause spotting and hazing on crockery, cutlery and glassware, helping washed items dry more quickly and appear clearer after each cycle. Suitable for professional washing environments, it supports consistent presentation where streak-free, polished results are important. The product can be used through automatic dosing equipment or added manually into the rinse cycle, offering flexibility for different machine setups.

Supplied as a blue, water-soluble liquid with a concentrate pH of 1, it should be handled with appropriate PPE. Keep out of reach of children when stored or in use.

Useful Information:

Product Code:	1769 / 17102
Product Colour:	Blue
Product Fragrance:	Odourless
pH Level:	1
Also available in:	5L, 10L

Directions:

Spot Free Rinse Aid should be used as a rinse additive in automatic dishwashers and glasswashers to help prevent spotting and hazing while promoting a clear, sparkling finish and faster drying. Where fitted, feed the product into the machine through the automatic dosing system. If manual dosing is required, add the product to the rinse cycle at a dilution rate of 1:600 with clean water. The mildly acidic formula helps neutralise detergent deposits on crockery and glassware, making it suitable for professional warewashing applications where a high-quality finish is required.

When handling and using the product, suitable gloves and safety glasses or eye protection should be worn, and the product should be kept out of reach of children.
