## FLOOR MAINTAINER

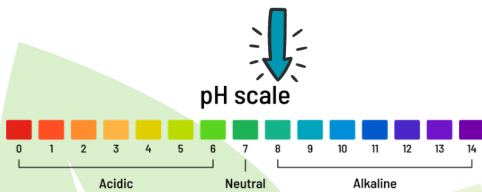

SAFELY ENHANCING POLISHED FLOORS

-  Taint free
-  Non-foaming
-  Easy Application

## Description:

ProJanta Floor Maintainer 5L is a highly efficient floor cleaner and polish maintainer developed to keep hard floors clean, glossy and well protected. It helps prolong the life of existing floor polishes while leaving surfaces looking fresh and well cared for. The formula is pleasant and fragrant in use, and can be burnished to produce a high gloss finish, making it ideal for routine maintenance in busy areas. Suitable for damp mopping or spray burnishing, it can be used on linoleum, PVC, rubber, sealed cork, sealed wood, terrazzo and thermoplastic floors. Supplied as a pink liquid that is fully miscible in water, it has a concentrate pH of 9.5. Do not use on unsealed wood or cork, and always wear gloves and eye protection during use.

## Useful Information:

Product Code:	2307
Product Colour:	Red
Product Fragrance:	Cologne
pH Level:	7-9

## Directions:

ProJanta Floor Maintainer should be used for the routine maintenance of polished floors to help prolong the life of floor polishes and restore a clean, high-gloss finish. For damp mopping, dilute the product at 1:20 with clean warm water and apply evenly across the floor surface. For spray burnishing, dilute at 1:8 with clean cold water, particularly in high-traffic areas where enhanced gloss restoration is required. Heavily soiled areas should first be scrubbed with a mild solvent-based detergent before application. After mopping, always allow the floor to dry fully before machine buffing. Suitable for use on linoleum, PVC, rubber, sealed cork, sealed wood, terrazzo and thermoplastic floors.

Do not use on unsealed wood or cork flooring. Protective gloves and eye protection should be worn during handling and use.
