SCRUB CLEAN EXTRA FLOOR MACHINE DETERGENT

-  Taint free
-  Non-foaming
-  Powerful Formula

Description:

ProJanta Scrub Clean Extra is a powerful low foam scrubber dryer detergent formulated to remove hardened dirt and stubborn grime from concrete and industrial floors. Designed for use both internally and externally, it is especially suitable for demanding environments where regular machine cleaning is needed to maintain floor appearance and cleanliness. Its low foam formula makes it ideal for use in scrubber dryer machines, while its full water solubility allows it to mix easily in machine solution tanks for convenient application. Suitable dilution rates range depending on the level of soiling, with stronger solutions recommended for dirtier floors. Supplied as an off-white liquid. It should be understood that this product is not for use on aluminium or zinc. Always wear gloves and eye protection when handling.

Useful Information:

Product Code:	250505
Product Colour:	White
Product Fragrance:	Sweet
pH Level:	13 - 14

Directions:

Scrub Clean Extra should be added directly to the clean water tank of a scrubber dryer machine and diluted according to the level of soiling present. For heavier dirt and grime, use at a dilution rate of 1:100, and for lighter cleaning use at 1:200. As a guide, a 1:200 dilution equates to approximately 200ml per 40-litre tank. The product is specially formulated for low-foam performance on concrete and industrial floors, making it suitable for both internal and external cleaning applications where scrubber dryer machines are used. Do not use on aluminium or zinc surfaces.

When handling and using the product, suitable protective gloves and eye protection should be worn, and the product should be stored in a cool, dry place after use.
