ELITE LEMON CONCENTRATED CARPET DEODORISER

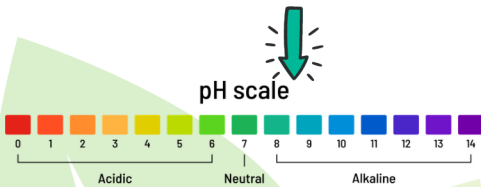

-  Kills Odorous Bacteria
-  Water Soluble
-  Lemon Scented

Description:

ELITE Lemon Deodoriser 5L is a concentrated, water-soluble odour neutraliser and air conditioner developed to tackle a broad range of unpleasant smells.

Tested to BS EN 1276, it kills 99.999% of odour-producing bacteria, helping address odours at source rather than simply masking them. Suitable for application by spray, mop or cloth, it offers flexible use across a variety of environments where freshness and hygiene are important. It can also be used on carpet spillages when followed by wet vacuum extraction, making it a practical option for treating accidental odours and contamination on suitable materials.

Useful Information:

Product Code:	2586
Product Colour:	Yellow
Product Fragrance:	Lemon
pH Level:	8 - 9

Directions:

Lemon Deodoriser should be diluted with clean water at a rate of 1:30 to prepare a fresh working solution, although a stronger solution may be used where odour problems are more severe. Apply the diluted product using a spray, mop or cloth and wipe the treated area clean as required. For carpet spillages, spray directly onto the affected area and remove excess liquid using a wet vacuum. Heavily soiled surfaces should be rinsed clean before disinfection, and all disinfectant solutions should be freshly prepared before use. Always carry out a colour-fastness test on carpets or fabrics by rubbing a small hidden area with a white cloth dampened in the solution; if colour transfers, do not use. Do not apply to materials that are intended for dry cleaning only.

When handling and using the product, suitable hand and eye protection should be worn, hands should be washed thoroughly after use, and the product should be kept out of reach of children.
