## SQUEEGEE MAGIC WINDOW CLEANING DETERGENT

- Low Streaking
- Economical Concentrate
- Powerful Formula

## Description:

ProJanta Squeegee Magic is a specialised window cleaning detergent formulated for the regular cleaning of windows and window surrounds. It effectively removes general grime, grease and traffic film, helping to leave glass looking clean, clear and well presented. Designed for professional glass cleaning, it supports a finish with reduced streaking and spotting when used with a T-bar and sleeve and then removed using a squeegee. This makes it a practical choice for maintaining a polished appearance on internal and external glass surfaces. Supplied as an orange, water-soluble liquid with a barely perceptible odour, it has a concentrate pH of 7-8. Suitable for routine use, it offers reliable results as part of a regular window cleaning programme. Always use appropriate PPE, including gloves and eye protection.

## Useful Information:

Product Code:	49253
Product Colour:	Orange
Product Fragrance:	Odourless
pH Level:	9

## Directions:

Squeegee Magic should be diluted at a rate of 1:160 with cold water before use. Apply the solution evenly to the glass using a T-bar and sleeve, then remove it with a squeegee using an "S" motion from top to bottom to achieve a clean, clear, streak-free finish. Any remaining liquid in corners and on sills should be removed with a dry scrim, taking care to minimise contact with the glass during finishing. The product is suitable for the routine cleaning of windows and window surrounds, helping to remove general grime, grease and traffic film while reducing streaking and spotting.

When handling and using the product, suitable gloves and eye protection should be worn, and the container should be kept tightly closed when not in use.
