A1 / A2 WIPES ANTI-BAC & ANTI-VIRAL WET WIPES

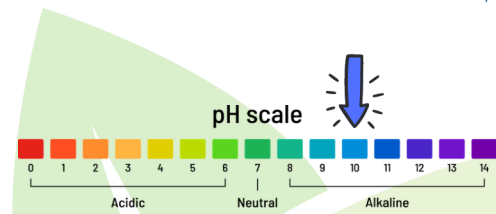

-  Kills 99.99% of Germs
-  Alcohol Free
-  Recyclable Tub

Description:

ProJanta A1 & A2 Antiviral Surface Wipes are strong, durable QAC-based sanitising wipes designed to deliver effective anti-bacterial and anti-viral performance in high-touch environments. Alcohol-free and PHMB-free, they help kill 99.99% of germs and bacteria as well as enveloped viruses, including Coronavirus, supporting improved hygiene and helping reduce the risk of cross-contamination during routine cleaning. Supplied in a convenient pop-up tub for quick and easy dispensing, they are ideal for fast-response sanitising across shared surfaces and frequently touched areas. The high-capacity tub is also 100% recyclable, offering a practical and more sustainable packaging option.

Manufactured in the UK to ISO 9001 and ISO 14001 standards, these wipes are available in tubs of 500 or 1000 for flexible use across commercial, public and workplace settings.

Useful Information:

Product Code(s):	5175 / 5169
Product Colour:	White
Product Fragrance:	Almost Odourless
pH Level:	10
Also available in:	x500 / x1000

Directions:

The A1 / A2 Antiviral Surface Wipes should be used directly from the pop-up tub for the rapid cleaning and sanitising of hard surfaces in high-touch and high-traffic environments. Remove a wipe from the dispenser and use it to thoroughly wipe the surface, ensuring full coverage of the area to help reduce the risk of cross-contamination. The wipes are suitable for routine use in workplaces, offices, gyms, airports, industrial environments and other public-facing spaces where effective antibacterial and antiviral surface hygiene is required.

After use, dispose of the wipe appropriately and keep the tub closed between uses to help maintain product performance.
