LIMESCALE REMOVER

HIGHLY EFFECTIVE CLEANER AND DESCALER

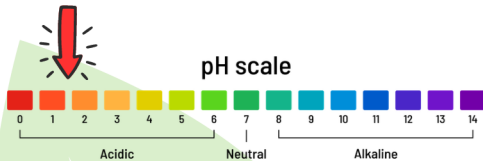

- Removes Severe Limescale
- Stainless Steel Safe
- Ideal for Wet-Rooms

Description:

ProJanta Limescale Remover 1L is a highly effective cleaner and descaler developed to remove severe water scale and body fats from hard surfaces while remaining safe for stainless steel.

Formulated as a viscous liquid combining concentrated detergents with phosphoric acid, it is ideal for deep cleaning pool sides, wet areas, pool walls, fixtures and fittings where scale and residue can build up over time. It can also be used as a deep-cleaning toilet descaler on stainless steel urinals, toilets and bidets, making it a versatile option for demanding washroom and wet-area cleaning.

Useful Information:

Product Code:	6408
Product Colour:	Clear
Product Fragrance:	Odourless
pH Level:	1.5

Directions:

Limescale Remover should be diluted with water according to the level of soiling, cleaning frequency and the texture of the surface being treated, using a stronger concentration for more heavily soiled or textured areas. For heavy soiling or monthly deep cleaning, dilute at 1:10; for medium or weekly cleaning, use 1:40; and for light or everyday cleaning, dilute at 1:80. Apply the prepared solution using a mop or cloth to pool sides, wet areas, pool walls, fixtures, fittings or stainless steel sanitaryware, ensuring even coverage across the affected surface. Leave the product in contact for a few minutes to help break down water scale and body fats, then agitate thoroughly to lift deposits before rinsing or wiping clean as required.

Suitable for use on stainless steel, including urinals, toilets and bidets, where effective descaling and deep cleaning are needed.
