## STERISOLV WASHROOM CLEANER AND SANITISER

- 4 in 1 Action
- EN 1276 Tested
- Maintains & Cleans

## Description:

STERI-SOLV Washroom Sanitiser 5L is a concentrated 4-in-1 product designed to clean, disinfect, descale and deodorise washroom and tiled areas effectively. Formulated for use on floor tiles, wall tiles and other washable surfaces, it helps remove fats, soap residues and everyday dirt while supporting high standards of hygiene. Safe for use on stainless steel and chrome, it is a practical choice for routine washroom cleaning where both appearance and sanitation are important.

Tested to meet BS EN 1276 requirements, it is effective against a wide range of bacteria including E. coli, MRSA, Pseudomonas aeruginosa and Enterococcus hirae. It also provides powerful cleaning action against spore-forming bacteria including Clostridium difficile (C-diff).

pH scale

## Directions:

Washroom Sanitiser should be pre-diluted with hot or cold water according to the level of soiling and the cleaning action required. For light cleaning, dilute at up to 1:50, using a stronger solution for heavier soiling, and apply with a mop, brush or cloth to floor tiles, wall tiles, stainless steel, chrome and other washable washroom surfaces. Work the solution into the surface to help remove fats, soap deposits and dirt, then rinse or wipe clean. For stubborn or heavily soiled areas, a stronger concentration may be used as appropriate to the task.

When handling and using the product, suitable protective gloves and eye protection should be worn. After use, keep the container tightly closed and store in a cool, well-ventilated area.
