STERISOLV ANTI-BAC FLOOR CLEANER

-  Dual Action Formula
-  Neutral Chemical
-  MRSA Effective

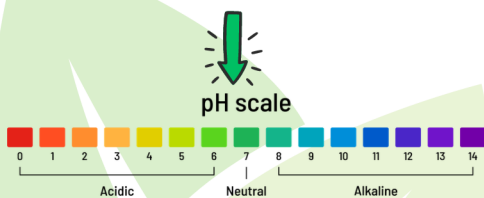

Description:

STERI-SOLV Bactericidal Floor Cleaner 5L is a neutral cleaner and disinfectant developed for routine floor hygiene in commercial and public environments.

Formulated as a low-foaming liquid, it cleans effectively while rinsing easily from surfaces, helping leave floors fresh, clean and well maintained after use. Its fresh violet fragrance adds to the overall cleaning result, making treated areas feel more pleasant and presentable. Suitable for use by hand with a mop or through a scrubber dryer, it offers flexible application for both smaller areas and efficient large-area cleaning.

Effective against MRSA at a 1:40 dilution, it supports consistent disinfection where hygiene standards are important.

Useful Information:

Product Code:	7327
Product Colour:	Yellow
Product Fragrance:	Sweet
pH Level:	6 – 7.5

Directions:

Bactericidal Floor Cleaner should be diluted with up to 40 parts water before use and applied evenly across the floor surface using a mop or scrubber dryer. The low-foaming formula is suitable for routine floor cleaning and disinfection in commercial and public environments, providing an easy-rinse finish and leaving a fresh violet fragrance after use.

For areas where MRSA-focused hygiene control is required, use at a dilution of 1:40. Suitable for regular large-area floor maintenance where an effective neutral cleaner and disinfectant is needed.
