PLEASE READ BEFORE COMMENCING ANY

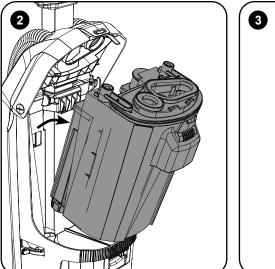

OPERATION AFTER THE REMOVAL OF ALL THE PACKAGING, CAREFULLY OPEN AND CHECK THE

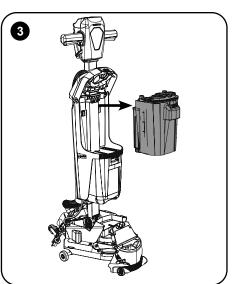

CONTENTS.

- CONTENTS Owner Manual • Battery Charger & Lead Battery Pack Scrub Brush Squeegee Assembly
- Main tank assembly removal

Remove the tank assembly from the front of the machine. Press button at the top on front of the tank assembly (A), lift the tank assembly up towards the main handle and out.

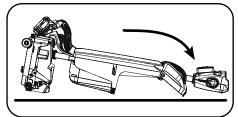

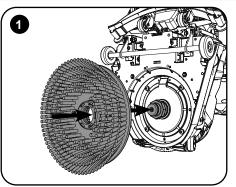

Lift and tilt the top of the tank assembly away from the handle as you remove. Place the tank assembly on a suitable surface in its upright/uppermost position.

#### **Brush Fitting**

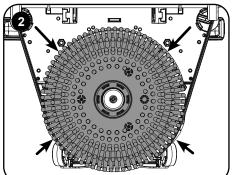

Make sure battery is removed before fitting or removing brushes.

Make sure the handle is locked in upright position and storage wheels are retracted. Remove the tank assembly (and battery if fitted) gently lay machine on its front

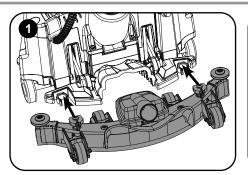

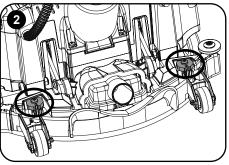

Push the brush / pad holder onto the brush motor mount (1 & 2). Note: Gloves are recommended to be worn whilst fitting and removing the brushes.

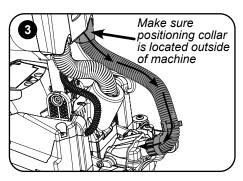

To remove the brush, place your fingers behind the brush deck in locations shown and gently wiggle off.

#### Floor tool and vacuum hose fitting

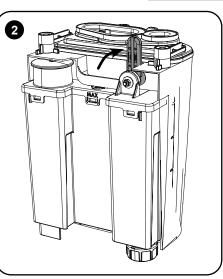

Push the floor tool carrier down and push the floor tool onto the retaining clips (1 & 2).

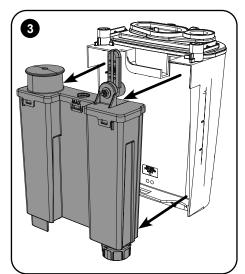

Take the hose and fit it securely over the centre fitting on the floor tool. Follow the arrows for the correct fit, making sure that the positioning collar is outside of the machine. Make sure hose stays loose and is not over stretched.

# 

After lifting onto a suitable work surface, turn tank assembly

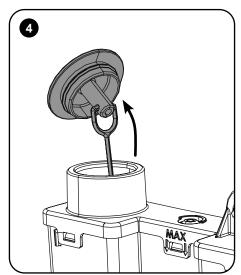

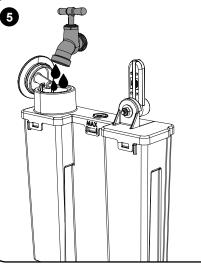

Turn clean water tank lock to release clean water tank.

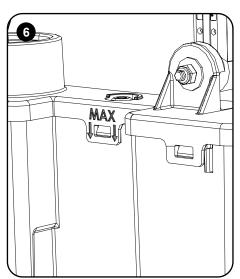

Clean water tank removal and filling

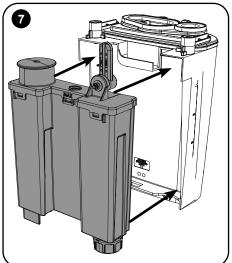

Remove the clean water tank from the tank assembly.

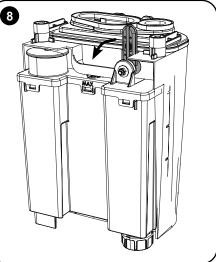

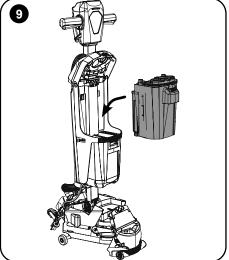

To fill remove the rubber stop from the filling neck. Note: There is a T piece keeping the rubber stop from being completely removed. Pour in the chemical (follow chemical manufactures dilution rates). Only fill the tank to the MAX fill line with clean water using a tap, hose or suitable water container. **DO NOT OVER FILL.** 

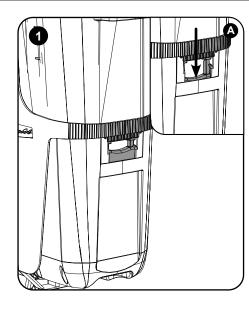

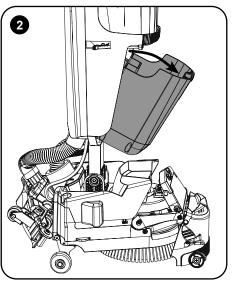

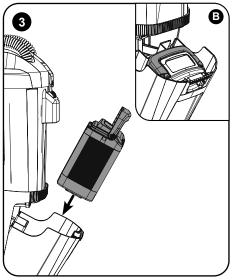

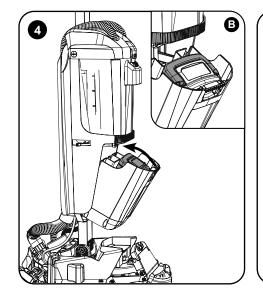

Place the tank back into the main tank body and turn lock to hold in place. Make sure it is securely fitted before fitting the tank assembly back on the machine.

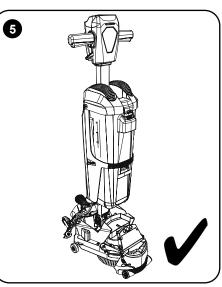

Battery fitting and water flow settings

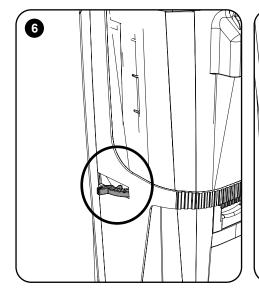

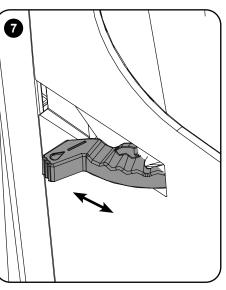

While holding down the battery compartment latch (A), tip battery compartment forward.

Lift the battery using the battery handle. Place the battery into the battery compartment ensuring it is securely in place and the orientation is correct (battery handle folds down towards the machine handle (B)).

Tip battery compartment back into place until latch clips closed.

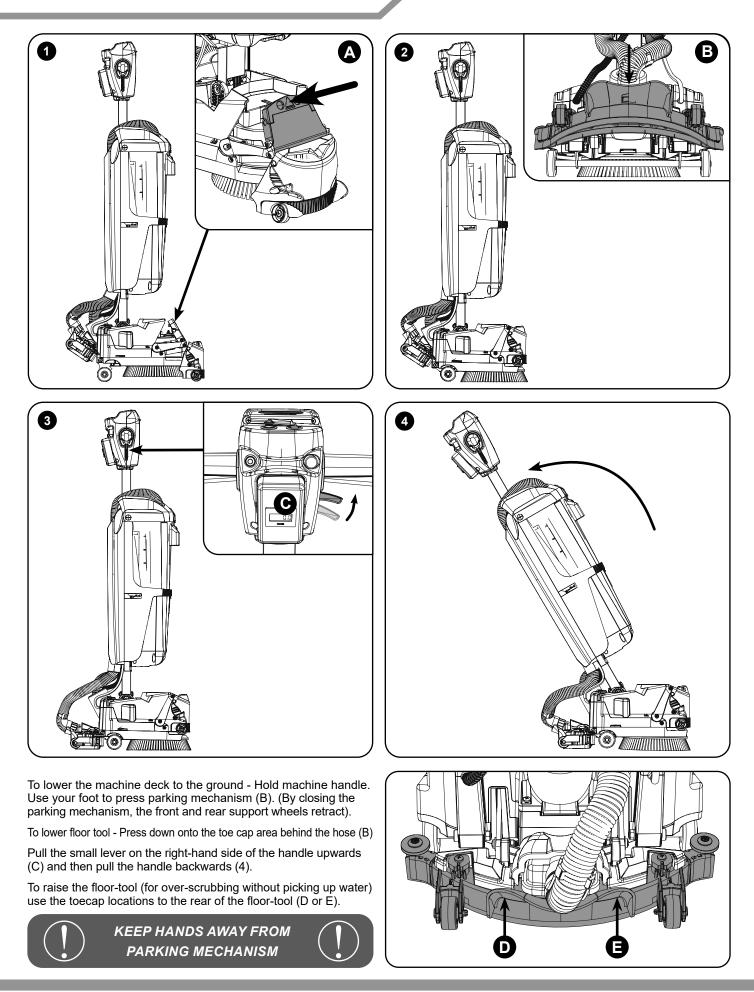

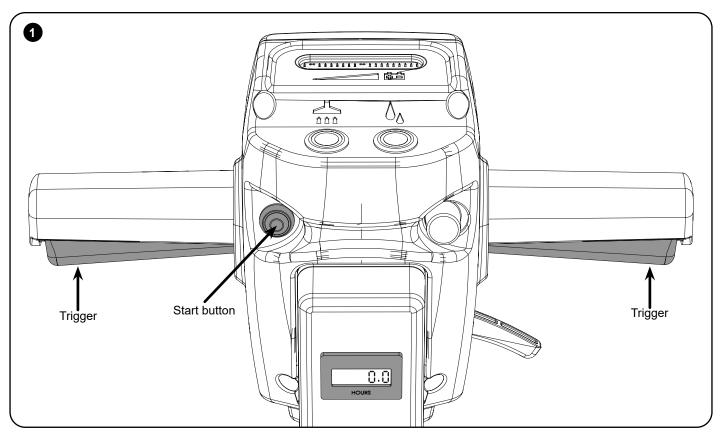

Located on the right side of the machine is the water flow control tap.

Push the fluid control lever to set the desired flow required, this will vary depending on what brush / pad and floor type the machine is being used on.

Note: On first use open the water tap fully and run the machine for a short period to purge the water flow then adjust tap to desired flow.

### **Machine Handle Operation**

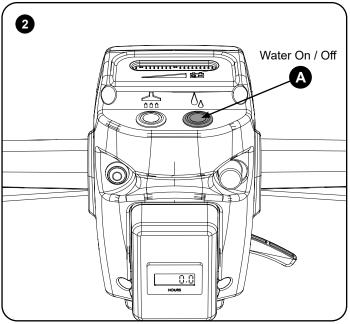

To start the machine, pull one or both triggers in and press the start button,

this will start the brushes spinning and the battery power indicator will illuminate to show the power level.

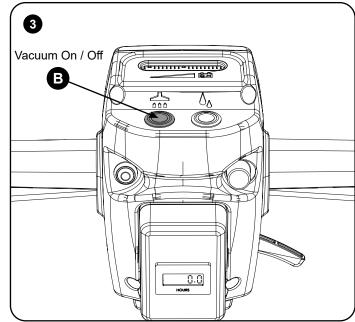

This will also cause the hours meter to start counting up, recording machine usage, indicated by the flashing dot on the display.

The hours meter display will always show the total hours even if the battery is removed from the product.

#### HOURS METER ONLY RECORDS WHEN BRUSHES ARE SPINNING

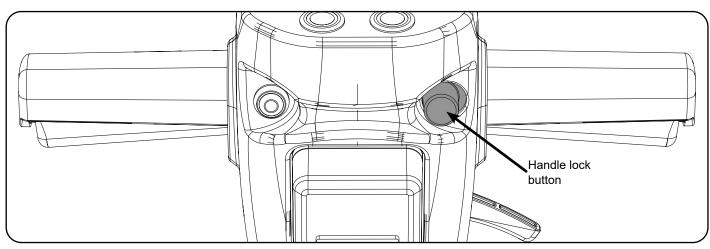

With either trigger pulled in press the water on button, this lights up blue to indicate it is on.

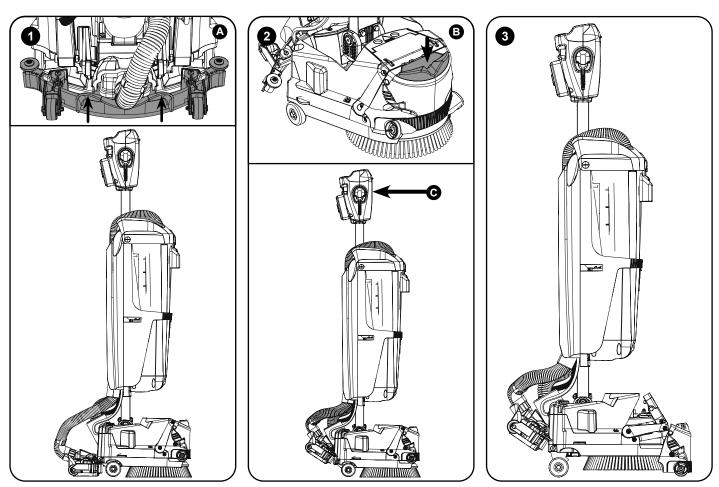

Press the vacuum on button, this lights up blue to indicate it is on and the vacuum starts. You are now ready to start cleaning.

# **Storage and Transport**

Make sure the handle is in the upright position and locked in place, push the handle lock button and locate handle in correct position.

### KEEP HANDS AWAY FROM PARKING MECHANISM

To raise the floor tool, use the toecap locations to the rear of the floor tool and lift up (A). To raise the machine deck off the ground. Hold onto handle. With your foot, press down on the front of the parking mechanism (B) while tipping the machine backwards (C)until the storage wheels click into position and the front support wheels extend (3).

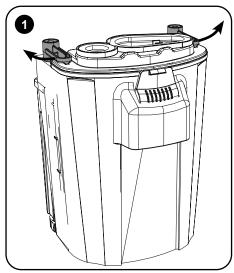

MAKE SURE THE HANDLE IS LOCKED IN THE UPRIGHT POSITION BEFORE LETTING GO OF THE HANDLE.

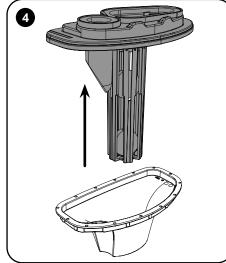

## **Regular Maintenance**

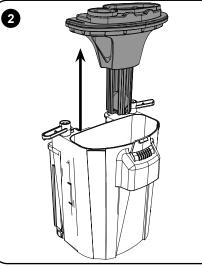

Separator removal and cleaning

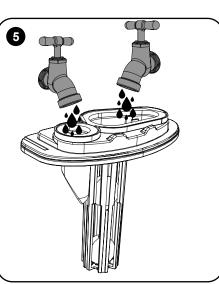

Twist separator locks to sides to unlock separator from tank.

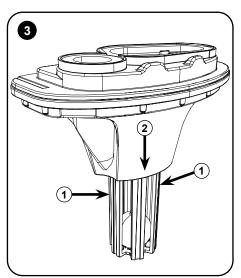

Fully remove separator from baffle.

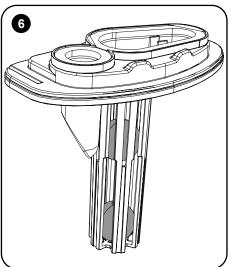

Lift the separator away from the tank.

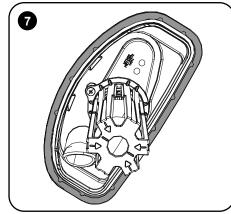

Once the separator has been removed, wash thoroughly under a tap making sure to run water through the tubes and to clean the grid filter.

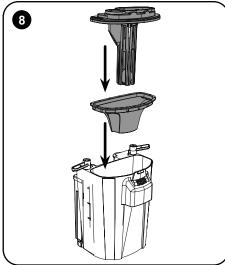

Gently squeeze sided of float valve cage (1) and slide down baffle (2).

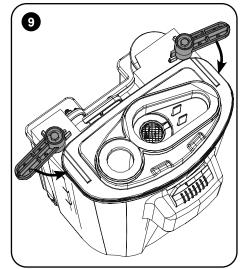

After cleaning separator, check float valve moves freely and is clean of any debris.

Once clean thoroughly check the rubber seal for any damage or cracks. If any damage or cracks are found on the rubber seal replace the separator. Failure to replace could cause loss in suction and machine performance.

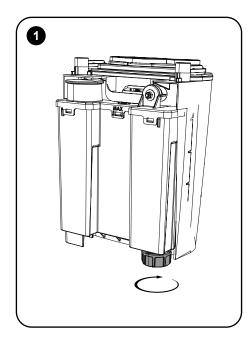

Refit the separator and baffle to the water tank.

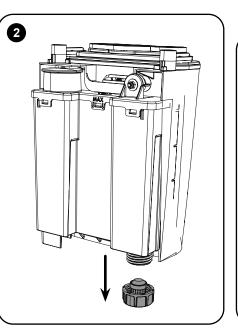

Twist separator locks to lock separator in place.

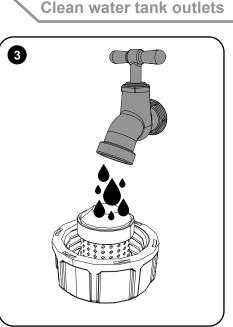

### **Regular Maintenance**

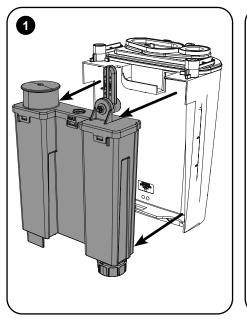

Make sure the clean water tank is empty. Unscrew the clean water outlet

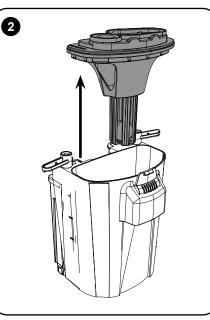

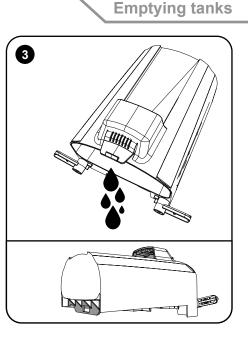

Remove the clean water outlet from the clean water tank.

Wash the clean water outlet thoroughly under a tap, make sure the filter is clean with no blockages. Check for any damage (if any damage is found replace the clean water outlet).

When finished using the machine it is good practise to empty and clean the tanks of the machine.

- To do this firstly remove the tank assembly from the machine (see set up),
- 1. Remove the clean water tank from the main tank body and empty.
- 2. Remove the separator from the tank.

3. Pick up the tank, use the front handle and base as handles, tip the contents into a suitable drain, rinse the tanks and repeat the emptying process. Refit the clean water tank and separator and place back onto the machine.

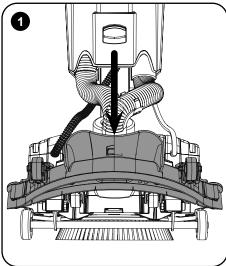

NOTE: IF THE MACHINE IS TO BE LEFT FOR LONG PERIODS BETWEEN USE, ENSURE THE CLEAN WATER TANK IS EMPTIED.

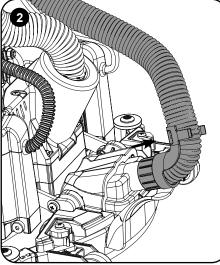

### **Regular Maintenance**

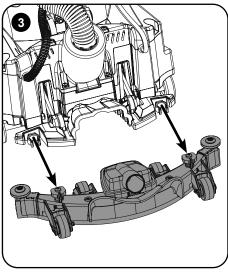

#### Fluid Trap Cleaning

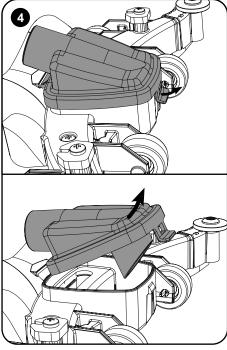

Lower floor tool by pressing down on toe cap area behind hose.

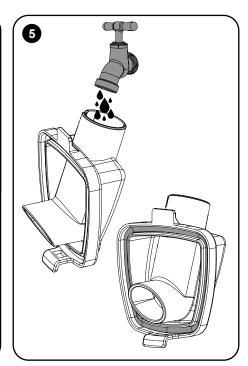

Remove hose from floor tool.

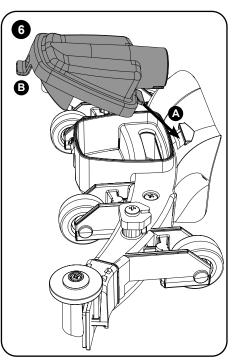

Pull the floor tool away from the machine.

Unclip front of fluid trap while lifting trap from floor tool.

Wash thoroughly and remove any debris. When cleaning check rubber seal for any cracks or damage.

Refit by locating lug in floor tool (A) and lowering fluid trap until front clip clicks (B).

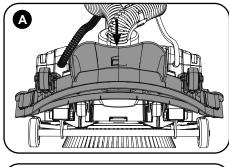

Daily Keep the machine clean. Ensure brushes / pads / squeegee / filters are in good condition. Check for any worn or damaged parts and replace immediately. Drain and rinse dirty water tank after every use.

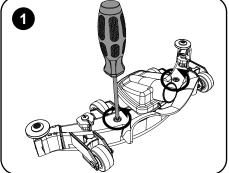

Weekly – as daily and – Check brush / pad and deck skirt, wipe and rinse. Check floor tool blades for wear and wipe clean. Clean separator assembly including filter and check condition of seal. Flush out system with clean water and clean filters. Maintenance

## **Changing the Floor Tool Blades**

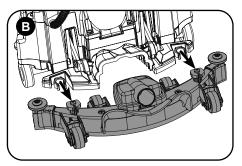

#### ALWAYS MAKE SURE THAT THE MACHINE IS SWITCHED OFF AND THE BATTERY IS REMOVED PRIOR TO ANY MAINTENANCE.

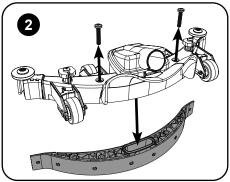

Unscrew the two screws securing the blade holder.

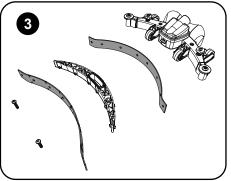

Remove the screws and blade holder.

To change the floor tool, firstly lower the floor tool by pressing down on the toe cap located behind the hose (A).

Pull the floor tool away from the machine (B).

Replace the Squeegee blades using replacement blade set (3), fitting the blades on to the moulded location lugs.

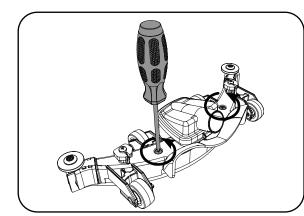

Refitting the floor tool blades

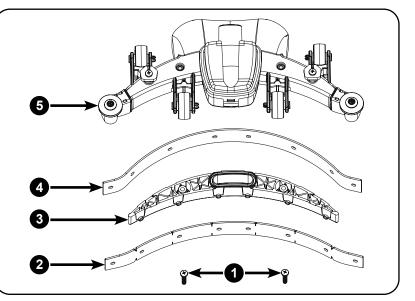

#### **Floor Tool Overview**

1. Screws x 2

- 2. Front blade (Slotted / Reversible)
  - 3. Blade carrier
  - 4. Rear blade
  - 5. Floor tool main body

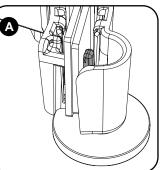

NOTE: The blades are designed to be reversible and rotated giving 4 usable surfaces (front, back, top and bottom, thus extending their useful working life).

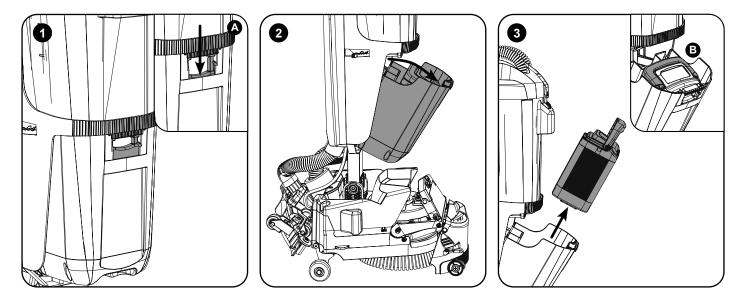

Refit the blade holder, retain using the two screws. Make sure the slotted blade goes to the front of the floor tool.

Make sure the end holes on both squeegee blades are positioned correctly on 'T' shaped clip mouldings (A)

### **Battery Removal and Charging**

Removing the battery

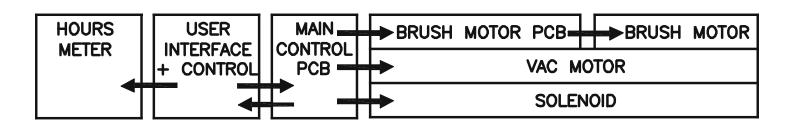

While holding down the battery compartment latch (A), tip battery compartment forward. Lift the battery using the battery handle.

The battery can then be lifted from the machine for storage or charging using the handle on the battery (B). For information relating to the operation and charging of your battery please refer to the battery and charger original operating instructions.

WEEE (Waste, Electrical and Electronic Equipment)

Scrubber dryer Accessories and packaging should be sorted for environmentally-friendly recycling.

Only for EU countries.

Do not dispose of scrubber-dryer into household waste.

According to the European Directive 2012/19/EU on waste electrical electronic equipment and its incorporation into national law. Scrubber-dryers that are no longer suitable for use must be separated, collected and sent for recovery in an environmentally-friendly manner.

### READ MANUAL BEFORE USE

COMPONENT	INTERVAL	INSPECT FOR
Battery Charger Lead	DAILY	Scuffing, cracks, splits, conductors showing
Brushes	DAILY	Bristle damage, wear, drive collar wear
Squeegee Blade	BEFORE EACH USE	Wear, cracks, splits
Filters	BEFORE EACH USE	Clogging and debris retention
Tanks	AFTER EACH USE	Rinse dirty water tank after use

As with all electrical equipment care and attention must be exercised at all times during its use, in addition to ensuring that routine and preventative maintenance is carried out periodically in order to ensure its safe operation. Operators shall be adequately instructed on the use of these machines.

Failure to carry out maintenance as necessary, including the replacement of parts to the correct standard could render this equipment unsafe and the manufacturer can accept no responsibility or liability in this respect. When ordering spare parts always quote the Model Number / Serial Number specified on the Rating Plate. Do not use for cleaning purposes on surfaces having a gradient exceeding that marked on the machine.

This machine is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge.

Children should be supervised to ensure that they do not play with the appliance.

Only use brushes provided with the appliance or those specified in the instruction manual.

The use of other brushes may impair safety.

A full range of brushes and accessories are available for this product.

Only use brushes or pads which are suitable for the correct operation of the machine for the specific task being performed.

It is essential that this equipment is correctly assembled and operated in accordance with current safety regulations. When using the equipment always ensure that all necessary precautions are taken to guarantee the safety of the operator and any other persons who may be affected.

Wear non slip footwear when scrubbing. Use a respiratory mask in dusty environments.

When cleaning, servicing or maintaining the machine, replacing parts or converting to another function the battery should be removed.

Machines left unattended shall be secured against unintentional movement. When detergents or other liquids are used, read the manufacturer's instructions.

This machine is not suitable for picking-up hazardous dust.

This machine is not to be stored outdoors or in wet conditions.

This machine is for indoor use only.

**NOTES:** This machine is intended for commercial use, for example in hotels, schools, hospitals, factories, shops, offices and rental businesses. This product meets the requirements of IEC 60335-2-72

- Ensure only competent persons unpack / assemble the machine.
- Keep your machine clean.
- Keep your brushes in good condition.
- Replace any worn or damaged parts immediately.
- · Ensure that the work area is clear of obstructions and / or people.
- Ensure that the working area is well illuminated.
- Pre-sweep the area to be cleaned.

- Use steam cleaners or pressure washers to clean the machine or use in the rain.
- · Allow any inexperienced repairs. Call the experts.
- Allow the machine to be used by inexperienced or unauthorised operators or without appropriate training.
- Use the machine without the solution tanks properly positioned on the machine, as shown in the instructions.
- Expect the machine to provide trouble-free, reliable operation unless maintained correctly.
- Allow water solutions to ingress to the battery.
- · Lift or pull the machine by any of the operating triggers, use the main handle.

### Numatic Lithium-ion Rechargeable Battery 36V | 8400mAh | 300Wh | 2.06KG | 10INR19/65-3

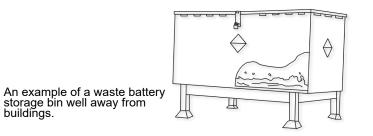

#### It is important that you observe the following information and warnings!

	Emergency Contact Info	ormation
Address:	CBAK BATTERY HEADQUARTERS Shenzhen BAK ENERGY Co. LTD, 2603A BAK Tech Bldg, 9th Keyan Rd, Hi-tech Park, Nanshan Dist, Shenzhen City, China	NUMATIC INTERNATIONAL LTD Millfield Road, Chard, Somerset, TA20 2GB, UK
Tel: Fax	0086-755-83283710 0086-755-8328649	0044-146-068600 0044-146-068458
	ww.numatic.com   www.numatic.de   www. ww.numatic.nl   www.numatic.co.za   www. www.numatic.it   www.nu	numatic.pt   www.numatic.es

#### **1. DEFECTIVE BATTERIES**

- 1. If a customer wishes to return a battery to a supplier, then collection of the battery must be arranged by the supplier; however, **Faulty batteries must not be returned through the postal system or by courier.**
- 2. If on return to a supplier, OR at a customer base, a suspected defective battery shows any signs of impact damage, distortion, blistering, loose parts, liquid ingress or leakage then on no account should it be offered for condition checking. It must be considered defective and the procedures described from item 9 below should be followed.
- 3. If, on return to a supplier, OR at a customer base, a suspected defective battery, that shows No signs of impact damage, distortion, blistering, loose parts, liquid ingress or leakage, may be offered for condition checking with an appropriate battery condition checking device operated by a competent person.
- 4. If battery is subjected to any liquid ingress users should put the pack upright immediately, with the terminal face downwards.
- 5. If checking shows the battery to be defective then the procedures described from item 9 below should be followed.
- 6. If on checking the battery is found to be operational then a single recharge cycle under observation can be attempted with the appropriate Numatic charger.
- 7. If the battery recharges correctly on this single recharge cycle then it can be deemed a good battery.
- 8. If the battery fails to recharge correctly on this single recharge cycle then it must be deemed a defective battery and the procedures described from item 9 below should be followed. On no account must any further attempt to recharge be made. A defective battery should not be stored inside buildings on any account.
- 9. The defective battery should be discharged by placing it in a container of salt water located in a well- ventilated area. This container should contain 25 litres minimum of saline water at a concentration of 15g common salt / litre of water. The container should have a closed locked lid but should not be sealed. The battery should be left fully immersed in the water to a depth of at least 100mm for at least 2 weeks. The water should be disposed of as hazardous waste when the discharge is complete.
- 10. The defective discharged battery can then be stored in a locked battery waste container which should be plastic or plastic lined and placed away from buildings and clearly signed as a defective battery container with appropriate warnings.
- 11. The batteries should then be sent for waste disposal according with your country's waste regulations.
- 12. Exhausted batteries are to be removed from the appliance and safely disposed of.

#### 2. HANDLING AND STORAGE

#### DANGER!

Improper handling can lead to an explosion or ignite a fire! Store batteries out of reach of children.

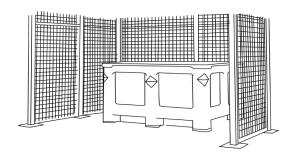

- Insert the battery in the appliance only when it is in use.
- Always remove the battery from the appliance for transport and when it is not in use.
- Storage temperature range: -10°C~55°C.
- Temperatures must not exceed 55°C.
- Relative humidity range: 45 to 80%.
- Optimum preservation of functionality: 15°C~25°C.

#### WARNING:

- Do not open the battery, disassemble it or allow it to fall from a substantial height.
- Protect the battery against short-circuiting danger of explosion!
- Protect the battery against rain, do not immerse in liquids especially flammable liquids danger of short-circuiting potential risk of fire or explosion. Follow defective battery disposal safety procedure. Insure the product is moved away from any combustible source.
- Protect the battery against direct sunlight, heat and fire.
- Do not incinerate the battery danger of explosion!
- Do not use defective or deformed batteries.
- Use only original NUMATIC chargers to charge the battery.

#### STORAGE:

- If the appliance is to be stored unused for a long period, the batteries should be removed.
- Good batteries should be stored in a protected area away from sources of direct heat and sunlight and should be kept dry.
- The temperature should not exceed 55°C but preferably not be above 25°C to maintain good battery performance.
- Storage area should be of low humidity, non dusty and a non corrosive atmosphere.

- An example of a well protected area with a cage to protect against accidental impact damage and with the batteries stored in a
  protective container to protect from heat, impact and accidental spillage of liquids.
- Care when handling / moving with forklift trucks or pallet trucks is needed at all times to avoid any physical damage to the batteries.
- If a good battery at any time is mishandled or subjected to any conditions that may damage it, as described in the battery instruction manual supplied, it must then be considered as defective and procedures followed from Item 1 of this document overleaf.

#### **3. HAZARDS IDENTIFICATION**

- Electrolyte may escape from damaged batteries. Avoid contact.
- Contact can cause skin irritation, burns and chemical burns.
- If liquid comes into contact with eyes, seek medical attention.
- Avoid inhaling any vapours formed or released caustic.

#### 4. FIRST AID MEASURES

#### In the event of contact with released electrolyte or electrolyte vapours:

- Eye contact flush eyes for at least 15 minutes with plenty of clean water without rubbing and seek medical attention.
- Skin contact wash affected areas of skin with plenty of water and soap; if irritation persists, seek medical attention.
- Inhalation provide fresh air or administer oxygen immediately and seek medical attention.
- Ingestion if electrolyte has been ingested, seek medical attention immediately.

#### Information for physicians:

 Contains caustic alkaline electrolytes in cells with lithium oxide, nickel oxide and cobalt/lithium manganese oxide cathodes – NO LITHIUM METAL OR LITHIUM ALLOYS.

#### 5. FIRE FIGHTING MEASURES

- In case of fire Keep clear of vapours and gases generated, take wind direction into consideration. If possible without danger, remove batteries from the vicinity of the fire. In principle, cooling or extinguishing with water is possible, but should only be done by trained personnel with sufficiently large quantities of water.
- If the hazard situation is unclear, extinguish only with ABC powder extinguishers (Class D extinguishers for fires involving metals are especially suitable).
- Fire fighters should only approach the fire wearing protective clothing and self-contained breathing apparatus.
- Once the fire has been extinguished, as a rule, the area should be monitored (fire watch) and cleaned up by trained and appropriately equipped personnel; fire residue should be contained and disposed of properly.

#### 6. EXPOSURE CONTROLS, PERSONAL PROTECTION

#### **Respiratory Protection:**

- In case of battery venting, providing as much ventilation as possible. Avoid confined areas with venting batteries.
- Respiratory Protection is not necessary under conditions of normal use.
- Ventilation:
- Not necessary under conditions of normal use.
- Protective Gloves:
- Not necessary under conditions of normal use.

#### Other Protective Clothing or Equipment:

- Not necessary under conditions of normal use.
- Personal Protection is recommended for venting batteries: Respiratory Protection, Protective Gloves, Protective Clothing and safety glass with side shields.

#### 7. ACCIDENTAL RELEASE

Disposal – Wear protective gear, wipe up with absorbent textile and dispose of as hazardous waste at collection points for hazardous waste according to national regulations.

#### 8. DO

- Use NUMATIC batteries only with NUMATIC appliances and charge them only using NUMATIC chargers.
- Charge battery before use.
- Store the battery out of the reach of children.
- Secure the appliance against unintentional start up remove the battery from the appliance before transporting or storing the appliance.
- Protect from rain and liquid ingress
- Protect from direct sunlight, heat, and open flames.
- Be aware of the risk of terminals of the battery-operated appliance or battery being short circuited by metal objects.
- Follow the disposal advice of the manufacturer and any internal waste management guidance.
- Use and store the battery with-in temperature range (as shown in Temperature Range Table).

**Warning:** Use only with Numatic battery charger. The battery included in this product must only be charged by the Numatic Charger and docking system supplied with the product and in NO circumstances should an alternative non Numatic charger be used as there is risk severe damage and fire could result.

Note<sup>\*</sup> "If batteries are subjected to temperatures beyond normal operating limits automatic shutdown will occur. Under these conditions allow the batteries to acclimatise at room temperature  $(18^{\circ}C - 22^{\circ}C)$  for several hours to allow the battery to wake up".

Temperature Ra	nge Table
CHARGING	5°C~35°C
DISCHARGING	5°C~35°C
STORAGE OPTIMUM	15°C~25°C
STORAGE LIMIT	-10°C~55°C

#### 9. DO NOT

- Throw battery into fire risk of explosion!
- Charge or use a defective, damaged or deformed battery including batteries subjected to liquid ingress.
- Open, damage or drop the battery.
- Expose the battery to microwaves or high pressure.
- Immerse in fluids, especially flammable liquids.
- Insert objects in the battery's cooling slots.
- Bridge (short circuit) the battery terminals with metallic objects since this may damage the battery.
- Use metal containers for transporting batteries.
- Expose the appliance or battery to excessive temperatures.
- Expose the batteries to high temperatures including direct sunlight.
- Crush, break open or physically abuse the batteries or the equipment that contains them.
- Use modified or damaged batteries.

#### 10. DISTRIBUTOR TAKE-BACK / DISPOSAL

On the basis of Battery Directive, the manufacturers take responsibility for financing collection, treatment and recycling of batteries used in devices. To this end, batteries must be handed over for disposal to the collection systems established for this under national law. Disposal of batteries together with household waste is prohibited; batteries must be collected separately according to type.

Return the battery free of charge to your NUMATIC servicing dealer for disposal or hand it over to an appropriate public collection point.

#### **11. CHARGING BATTERIES**

• The charger is intended for use only on flat surfaces, place horizontally on floor or work surface. The charger is intended for use with the detachable power cord supplied, the power unit is capable of operating at different voltages without user adjustment. If the charger is damaged or does not charge anymore, please return to service centre.

#### **Charging Procedure:**

- Rechargeable batteries are to be removed from the appliance before being charged.
- Ensure the battery is fully inserted into the charger.
- Fit the mains power cord to charger and suitable power supply.
- Please Note: If the battery is above its optimum charging temperature (due to ambient temperature or it if was recently discharged) the charger LED will illuminate on/off RED for a maximum of

40 minutes whilst the battery temperature falls to an acceptable level for charging to begin.

- The LED should show RED to indicate charging.
- Once fully charged the LED will show GREEN.
- If power is supplied to the charger with no battery fitted the LED will show GREEN to indicate STAND-BY status.

#### CAUTION!

- Protect the charger against moisture and store it in a dry place.
- Check the mains cord regularly for any sign of damage.
- Do not use damaged devices.
- If the mains cord of the charger is damaged, it must be replaced by an original NUMATIC INTERNATIONAL cord available from the manufacturer or service agent.

#### 12. WARRANTY

#### Lithium-Ion Battery Warranty

- Warranty: Commercial Use
- a. Batteries are warranted (3 Year) providing all battery care rules are followed
- b. To claim warranty the following details must be supplied
- i. Serial number of the machine (See page 16)
- ii. Battery date code
- iii. Date purchased
- iv. Proof of Purchase
- v. Maintenance history and charging regime
- Failure to use the correct Numatic charger will void your warranty.
