## ECO LOGIK TOILET CLEANER AND DESCALER

-  Cleans & Disinfects
-  Dissolves Scale and Soiling
-  Sweet Scent

## Description:

ECOLOGIK Toilet Cleaner is a thick, bactericidal toilet and washroom cleaner developed for both effective descaling and routine washroom cleaning. Formulated with a blend of sulphamic and citric acids, it helps dissolve limescale and organic deposits while also removing grease, body oils and soap scum from a range of sanitary surfaces. Used neat, it is ideal for cleaning and descaling toilets and urinals, while it can also be diluted for wider washroom cleaning on sinks, showers and other hard surfaces. Safe for use on stainless steel, it is well suited to busy environments such as hotels, restaurants, nursing homes, hospitals, offices, shops and airports. Supplied as a thick blue, sweet-smelling liquid that is water soluble, it has a concentrate pH of 2.

## Directions:

Directions for Use: Toilet Cleaner should be used neat for toilet and urinal descaling and diluted for general washroom surface cleaning. For heavy toilet bowl cleaning, first remove the water from the bowl by forcing it over the trap with a mop applicator, then pour the product neat into the bowl and spread it evenly around the surface. Flush with clean water and scrub any remaining solution into the water. For regular toilet cleaning, apply the product evenly above the water line, leave for 10-15 minutes, then flush thoroughly with clean water. For urinals, apply to the top of the urinal, scrub the affected areas with a brush or suitable applicator, and then flush with clean water. For hard surfaces such as sinks, showers and other washable washroom areas, dilute at 1:40 with warm water and wash using the applicator of your choice. Suitable for use on stainless steel and other washroom fixtures where descaling and routine bactericidal cleaning are required. When handling and using the product, suitable protective gloves and eye protection should be worn. After use, keep the container tightly closed and store in a cool, well-ventilated area.

## Useful Information:

Product Code:	CG02 / CG013
Product Colour:	Blue
Product Fragrance:	Parma Violets
pH Level:	2
Also available in:	1L, 5L
