ECO LOGIK CARPET CLEANER

-  Prevents Re-Soiling
-  Non-foaming
-  Suitable on Wool

Description:

ECOLOGIK Carpet Cleaner 5L is a concentrated, non-foaming cleaner developed for use in extraction machines to clean and revitalise carpets and upholstery. Formulated with cleaning agents, perfume oils and anti-resoiling agents, it helps lift dirt effectively while reducing the speed at which fibres become soiled again after cleaning. Suitable for use with hot or cold water, it can be applied to a wide range of water-washable fabrics, including woollen carpets and rugs, making it a versatile option for professional carpet care.

Free from optical brighteners, enzymes, solvents and phosphates, it is well suited to hotels, pubs, offices, care environments and vehicle valeting.

Directions:

Carpet Cleaner should be diluted with hot or cold water according to the level of soiling, using 1:100 for normal cleaning and 1:50 for heavy-duty applications. Apply through a suitable extraction machine to clean and revitalise carpets, upholstery and other water-washable fabrics, including woollen carpets and rugs. During use, extract as much liquid as possible to support effective cleaning and quicker drying, and avoid rubbing the carpet; instead, use the carpet lance in a slow, steady motion across the surface. For heavily soiled areas, the product may also be used as a pre-spray before extraction. After cleaning, allow the carpet or fabric to dry fully, preferably overnight.

When handling and using the product, suitable protective gloves and eye protection should be worn. After use, keep the container tightly closed and store in a cool, well-ventilated area.
