SPRAY & WIPE ANTI-BAC MULTI-SURFACE CLEANER

- Efficient RTU Bottles
- Multi-Action Cleaner
- Powerful Formula

Description:

ProJanta Spray & Wipe is a bactericidal multi-surface cleaner developed for quick and convenient cleaning on all washable surfaces. Formulated to clean and sanitise in one step, it helps remove everyday dirt and contamination while leaving behind a fresh, sweet fragrance after use. Its simple spray, agitate and wipe or rinse application makes it ideal for routine hygiene cleaning in a wide range of environments. It can also be used as a telephone sanitiser by spraying onto a cloth or paper first, then wiping the surface clean. Supplied as a colourless, water-soluble liquid with a concentrate pH of 8-10, it offers practical versatility for regular maintenance cleaning.

Available in both 750ml and 5-litre formats to suit different cleaning requirements.

pH scale

Useful Information:

Product Code:	HK015 / HK01750
Product Colour:	Clear
Product Fragrance:	Sweet Fragrance
pH Level:	7
Also available in:	750ml, 5L

Directions:

Spray & Wipe should be used undiluted for the quick cleaning and sanitising of washable surfaces. Spray the product directly onto the surface, agitate with a suitable cloth or applicator, then wipe or rinse away and dry as required. For awkward or electrical surfaces such as telephones and keyboards, do not spray directly onto the item; instead, spray the product onto a cloth or paper first, then wipe and agitate the area carefully. Suitable for everyday use on washable hard surfaces including touchpoints, desks, counters and general housekeeping areas.

When handling and using the product, suitable protective gloves and eye protection should be worn, and the product should be stored in a cool, well-ventilated area.
