## RAPID EXTRA KITCHEN CLEANER & SANITISER

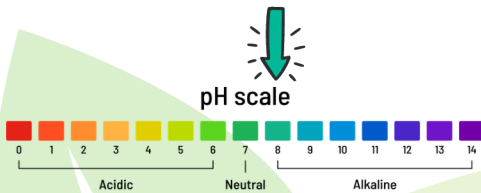

-  Wide Usage
-  Non-foaming
-  Powerful Formula

## Description:

ProJanta Rapid Extra Kitchen Cleaner is a bactericidal cleaner degreaser developed for hygiene-critical food preparation environments. Designed for use in kitchens, bakeries, restaurants and food production areas, it cleans and disinfects in one operation, helping save time while supporting high cleaning standards. Suitable for use on all hard surfaces, it is ideal for wiping down food preparation areas, table tops and other frequently used surfaces, including end-of-shift cleaning routines. Its spray foam application makes it easy to use, with the product simply applied and then wiped or rinsed away as required.

Supplied as a colourless, water-soluble liquid with a concentrate pH of 6, it is available in convenient 750ml spray bottles or a 5-litre bulk container for refilling and regular use.

## Directions:

Rapid Extra Kitchen Cleaner should be applied directly to the surface as a spray foam for the effective cleaning and degreasing of hard surfaces in kitchens, bakeries, restaurants and food production areas. Spray onto the affected area and allow the product to soak briefly, or gently work it into the dirt where heavier soiling is present.

Once cleaned, rinse with clean water or wipe away using a clean cloth as appropriate. The product is suitable for use on food preparation areas, table tops, counters and other hard surfaces, making it ideal for routine hygiene cleaning and end-of-shift wipe-downs.

When handling and using the product, suitable protective gloves and eye protection should be worn. After use, keep the container tightly closed and store in a cool, well-ventilated area.

## Useful Information:

Product Code:	HK03750 / HK035
Product Colour:	Yellow
Product Fragrance:	Alcohol
pH Level:	6 - 9
Also available in:	750ml, 5L
